### **VP6G Pitcairn Island –update April 1 by Gerben PG5M**

When I was planning this trip, I built-in time buffers, just for the worst case. Well the worst case happened. In Los Angeles I learned that one of my suitcases was still in Paris. The trackers I placed in the suitcases also showed one still in CDG airport. What I had in LAX was one suitcase with SPE amplifier, DX Commander materials and a power supply. The golf bag contained the Spiderpole for the DX Commander, the HexBeam and 100 meters of coax. The suitcase that was missing contained all the radio's, cabling, power supply, tools, etc. plus my personal stuff.

When talking with Air France in LAX, they told me the missing suitcase would be on the same flight with me to Papeete. When I arrived in Papeete, the suitcase was not there. So again I went to Air France. Now I was told that it would arrive the next day at 05:30 LT. My next flight with Air Tahiti to Mangareva will depart at 06:30 LT so there is a big challenge. Air Tahiti will try to get my suitcase from the AF flight into their plane. If they don't succeed or AF arrives late, I have to cancel the whole trip. I hope for the best.

In the meantime, heavy storms surround Pitcairn Island and even caused some damage to the chalet I have booked.

### **FT4GL Gloriose Islands –update**

Good news for 6m / 50Mhz fans: FT4GL will also now be QRV on the Magic Band, propagation permitting.

### **3Y0K Bouvet Island –update by Ken LA7GIA**

We have made some further adjustments as Allan EA3HSO is replacing Dave WD5COV as a Bouvet operator. Dave has to withdraw due to family reasons.

We will update our website to reflect the latest changes with the removal of remote radios; the current Bouvet operation is thus planned with only local radios. Our four-man support team together with four crew members will be assisting us setting up and running the camp. This will add operating time for the 3 operators that will seek to have 3-5 radios running simultaneously. We still plan for a 2nd QTH dedicated to run NA stations. This QTH will provide a better take off and will contain two stations covering 40-10m, and this will also give us antenna separation to run in-band. <https://www.dx-world.net/3y0k-bouvet-2025/>

### **A8OK Liberia -update March 4 1245z**

Here's all the A8OK team at Brussels airport with almost 500kg of luggage. Next stop Monrovia, Liberia.

**OC-261 Flinders Isl** The team that activated VK5TIL last year is going to be active again this year from Flinders Island, South Australia, between April 14-21. 6 Operators (VK5GR, VK5PAS, VK5HS, VK5LA, VK5FR and VK5GA) will be running all modes from 160m-70cm, including both both terrestrial and satellite modes. We will be participating in both the IOTA programs (OC-261) and the WWFF programs, with the main station is located in VKFF-0175 and additional island portable activities also planned from the two other parks zone VKFF-1717 and VKFF-4307 while there.

The last IOTA activation from the island was by Craig VK5CE/P back in August 2013 so this has been dormant for some time now. We hope that the combination of IOTA and WWFF activity will be of interest not only domestically but globally as well. QSLs will be handled by M0OXO via his OQRS service. Cards and LoTW will be available at the appropriate times. We are also looking at how we might use Club Log during the event as well.

If you would like to find out more, you can visit our [website](#). We will be adding further information as the project planning is completed. The team is looking forward to working everyone in April!
